

Testimonials

STARS: Justware has been a wonderful program for the Ward County State's Attorney's Office to adjust to, learn, and implement into our everyday routine. We were originally on the SAMS system, which was slow and did not do a lot of the things we wanted, such as carrying over information from SAMS to our Word Perfect documents. Justware does this for us, and in a speedy manner. We were amazed at how quickly the documents were generated and how much information was carried over, making for much less duplicate entry. We have also been very pleased with the help we have received from the CJIS staff, as well as the New Dawn staff. The data conversation went smoothly with very little clean up on our part. Overall, this transition for our office has been a very positive experience and hopefully one day the whole state will climb aboard to make this system a statewide information system, which will benefit all prosecutor offices in their overall mission.

Developed by New Dawn Technologies, JustWare is one of the most powerful and flexible case management tools available. Case management software (or CMS) provides organizations with an electronic means of managing caseloads. JustWare is a complete case management system in one package; it gives the ability to save case and name information, automate document and form generation, track and collect financial obligations, and more. Rather than simply keeping track of information, JustWare helps to save time and resources by increasing efficiency and automating important tasks and workflows.

Features and Benefits

Organize your information: JustWare organizes all of a case's related information—including charges, pleas, case notes, witnesses, involved agencies, contact information, documents, court dates, and more—in one place.

Organize your schedule: JustWare provides calendars as well as two-way synchronization with Microsoft Outlook, and automated alerts and reminders to make sure nothing is missed.

Work more efficiently: JustWare helps focus on the most important tasks by eliminating or reducing the number of other tasks to do along the way.

Find documents & information: JustWare provides powerful searching and barcoding capabilities to enable finding any file in the office, whether stored in JustWare or as a physical item.

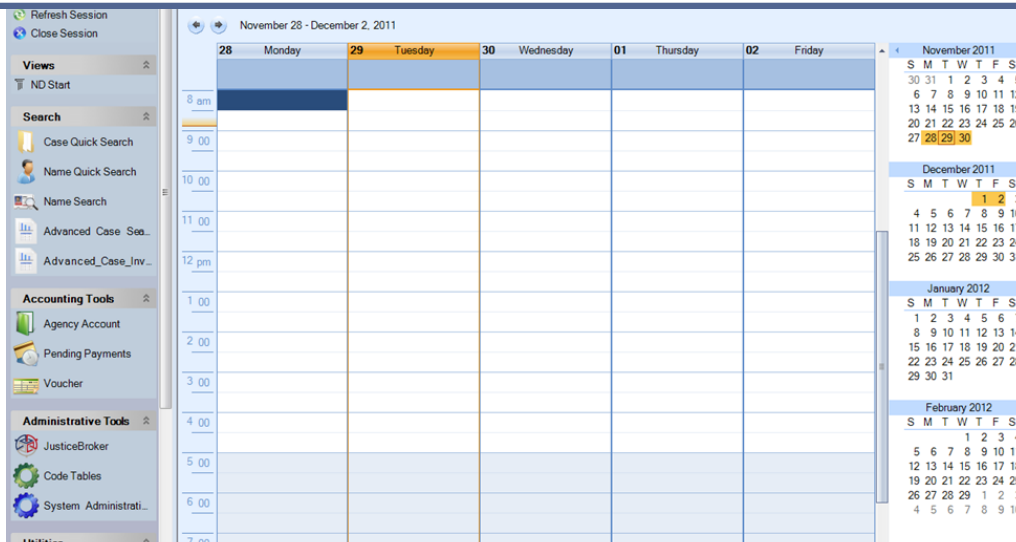

Meet your specific needs: JustWare is extremely flexible and can be configured to handle any need.

Share and receive information: JustWare enables to share select data with other agencies and divisions.

Report on key information: JustWare seamlessly merges reporting and case management software for your end users.

Powerful e-discovery solutions: JustWare provides discovery access online with JusticeWeb solution, JustWare is designed to ease discovery requirements.

Keep information secure: JustWare provides extensive security tools to keep data secure, including role-based or user-based security, as well as data partitioning and auditing.
